

Mountain Climber's Conversion

Assignment: Turn this Sprinter 170 4X4 into a luxury traveling conversion that can be used for mountain climbing excursions. Our client has already scaled parts of Mount Everest, and plans to climb the tallest mountain in Colorado, Mount Elbert. With a full RV build, pop up windows, and a Starlink satellite receiver, our client is ready to climb the highest peaks.

Mount Elbert, the highest mountain in Colorado, stands at 14,440 feet tall. It is located southwest of Leadville in the White River National Forest. Mount Elbert is popular with tourists because of its "false peaks" that are used for drive-by scenic views.
