

Rock and Roll Touring Conversion

Assignment: Turn this Sprinter 170 4X4 into a rock and roll touring transporter. Our client has a four-person band including a singer, a guitar player, a bass player, and a drummer that tour around the world. This tour bus includes a high end sound system with a powerful woofer mounted in the ten person couch to play their rock and roll music on the road.

The band, known as Engineered Society Project, just recorded a new album. They are currently touring in Europe backing up some other well known heavy metal groups.
