

Sports Travel Conversion

Assignment: Convert this Sprinter 144 4x4 into a luxury sports travel van for transporting the kids and their team to and from their tennis matches. In addition, the client is an alumni of Kansas University and desired a motif to match his alma mater.

Clients often want to incorporate a motif from their school or sports team. In this case, the Kansas University motif was used in several ways including pillows, headrests, throw rugs, and even a blow horn under the hood that would play the Kansas University team's musical cheers and chants.
